20.. - USA

2017 - Japan

2021 - Talacrest

This example was completed in 1967 and although the original intention was to sell it in Milan, through local dealer Crepaldi, in the end it was included in a lot of cars shipped to American importer Luigi Chinetti Motors. In the November of the same year, it was supplied to Bill Harrah's Modern Classic Motors in Reno (Nevada), which, at the time, was the West Coast distributor for Ferrari.

It has enjoyed an ownership roster including a number of well known Ferrari collectors and unusually for a car of this kind, it has never been totally dismantled or completely restored and is still a matching-numbers car. According to previous certified records, dated 1976 and 1983, it had done 31,000 miles in 1976 and 40,000 miles in 1983, and 38 years later has still a recorded mileage of only 43,000 miles.

A reference example of the ultra desirable 4 cam model and beautifully preserved as a car by knowledgeable custodians, it is in superb condition, having covered a mere 150 miles over the last 4 years and is ready to tour, event or show.
